INTRODUCTION

The first twenty-five Seminars on the Acquisition of Latin American Library Materials yielded nearly five hundred printed Working Papers and Annual Reports treating issues of major current and ongoing concern to Latin Americanists. Included are many bibliographies on a variety of topics, as well as theoretical articles, research reports, surveys, practical case studies, and other useful information. The Index to the SALALM Papers, 1956-1980 was prepared to provide access to these valuable resources.

The only Annual Report not fully indexed is the lengthy, varied "Progress Report on the Seminar," prepared annually by Marietta Daniels Shepard from the third through the eighteenth Seminar. Detailed access to the wealth of information contained in all but the last three of these reports is provided by a 1975 SALALM publication, Index to the SALALM Progress Reports; 1956-1970, compiled by Rosa Abella, Amelia Mederos, and Haydée Piedracueva. No attempt was made to index the Summary Reports of the Sessions, but three appendices to the Summary Reports, published in the Final Report of the second Seminar, were included because of their appropriate content.

The index is divided into separate Subject and Author sections. Headings in the Subject section are based on the Library of Congress's Subject Headings, 9th edition, adapted to meet the specialized nature of the material treated. To facilitate access, citations appear under as many as four subject headings.

The Author section contains entries for personal, joint, and corporate authors in a single alphabetical listing. Cross references in both sections guide the reader to proper headings and form of entry and tie together related topics.

The following bibliographic information is given for most entries: author(s), full title of the paper, abbreviated title of the volume (see the list of abbreviations used, below), volume number corresponding to the number of the Seminar, location of the Seminar, part number of the volume where applicable, date of the Seminar, inclusive page numbers, and appropriate bibliographic notes. For volumes having no consecutive paging, the number of the paper is cited instead.
In instances where an Annual Report retains essentially the same title, treats the same subject(s), and has been prepared by the same person for two or more consecutive years, the citations are combined into a single, collective entry that identifies the span of volumes and dates in which the report appears. Page numbers are replaced by the statement, "All issues."

The index was produced and typeset entirely by computer using programs designed at the University of California, Los Angeles, Latin American Center for the Hispanic American Periodicals Index. Any divergence from standard citation format is attributable to the necessity of conforming to the requirements of that system.

The Papers appeared under four different titles before they became standardized with the eighth Seminar. Complete citations for each of the Seminars precede the index. In the body of the work the titles are abbreviated as follows:

- **Final Report**: FR
- **Final Report and Papers**: FRP
- **Final Report and Working Papers**: FRWP
- **Working Papers**: WP

Two sets of Working Papers, Volumes II and VI, were never published. They were indexed from preprints borrowed from the Nettie Lee Benson Latin American Collection of the University of Texas at Austin General Libraries. The Editor wishes to thank Jane Garner of the Benson Collection both for her assistance in unraveling the complexities of the Papers' history and in making these items available for inclusion.
